Irtaza Ahmad

AI/ML Engineer

Lahore, Punjab, Pakistan | +92 305 6288860 | irtazaahmad2715@gmail.com
linkedin.com/in/irtaza-ahmad-1962602a5 | github.com/Irtaza-Ghafoor | Portfolio

Professional Summary

Gold Medalist in Computer Science and an analytical AI/ML Engineer with hands-on experience in designing, benchmarking, and deploying end-to-end machine learning pipelines. Proficient in advanced feature engineering, data preprocessing (including MICE imputation), and building high-performance ensemble models (XGBoost, LightGBM, CatBoost). Demonstrated track record of developing predictive solutions across healthcare, telecom, and drug discovery sectors. Passionate about solving complex real-world problems through data-driven intelligence and modern ML best practices.

Technical Skills

Programming	Python, C++
Machine Learning	Supervised Learning (Classification & Regression), Ensemble Learning (Voting, Stacking, XGBoost, LightGBM, CatBoost, Random Forest), Feature Engineering, Hyperparameter Tuning
Data Engineering & EDA	MICE Imputation, Feature Scaling, Frequency/Target Encoding, Advanced Regex, Matplotlib, Seaborn
Frameworks & Libraries	Scikit-learn, Pandas, NumPy
Tools & Version Control	Git, GitHub, Jupyter Notebook, Google Colab, Figma (Basic)

Experience

AI/ML Intern — Infinitiv.ai **2026 – Present**
Lahore, Pakistan

- Build and evaluate machine learning pipelines — regression, classification, and ensemble models.
- Collaborate on data preprocessing, feature engineering, and model deployment for production-ready AI solutions.

Flagship Projects

Customer Segmentation Matrix **[GitHub]**
Unsupervised Learning — Python, Scikit-learn, K-Means++, Elbow Method
Built an end-to-end K-Means clustering pipeline with Elbow and Silhouette analysis to segment customers into 5 distinct behavioral groups.

Chronic Kidney Disease Prediction **[GitHub]**
Healthcare Diagnostics — Python, Scikit-learn, XGBoost, MICE Imputation
Built a soft-voting ensemble (Random Forest, XGBoost, Logistic Regression) with MICE imputation to screen chronic kidney disease risk from clinical records.

Used Car Price Prediction **[GitHub]**
Regression — Python, Scikit-learn, Pandas, NumPy
Deployed a Voting Regressor (Random Forest + XGBoost) with custom Regex preprocessing, achieving an R^2 Score of 0.9429.

Telecom Customer Churn Prediction **[GitHub]**
Classification — Python, Scikit-learn, XGBoost, Pandas
Built a soft-voting classifier to identify high-risk churn customers, achieving a ROC-AUC Score of 0.8443.

Education

BS Computer Science (Lateral Entry) **2025 – 2027**
Bahria University, Lahore Campus — Current CGPA: 3.60 / 4.00

Associate Degree in Computer Science **Graduated 2025**
Bahria University, Lahore Campus — CGPA: 3.84 / 4.00, Batch Rank 1st, Gold Medalist

F.Sc Pre-Engineering **2021 – 2023**
Unique College

Certifications

Machine Learning for Beginners — Sololearn, 2026
Introduction to Python — Sololearn, 2026
