## PROFESSIONAL SUMMARY

Full-Stack Developer and Computer Science student (BSCS, Superior University) who loves building web applications that solve real-world problems. Experienced in the MERN stack and Next.js, I specialize in turning complex requirements into clean, easy-to-use digital tools. From creating custom academic dashboards to secure utility applications, my goal is to write reliable, scalable code that makes a positive impact for users, with a growing focus on integrating AI-driven features into web products.

## TECHNICAL SKILLS

|                |                                                   |
|----------------|---------------------------------------------------|
| Languages      | TypeScript, JavaScript, PHP, HTML5, CSS3          |
| Frontend       | React, Next.js, Vite, Tailwind CSS, Framer Motion |
| 3D & Animation | Three.js, React Three Fiber, GSAP                 |
| Backend        | Node.js, Express.js, PHP, REST APIs               |
| Databases      | MongoDB, MySQL                                    |
| Tools & Cloud  | Git, GitHub, VS Code, Vercel                      |

## EXPERIENCE

|                                                                                                                                                                                                                                                   |                |
